

I would like to say "Thank you, Dr. Robson." My son can't get more confidence and happy feeling without your treatment.

My son was nine years old and was wetting his bed for most of the time at night. At daytime, he has to use the washroom more often than any other students in his class at school. We always think his bladder is smaller than his classmates. Because of my son's problem, all of my family members were left with a troubling thought if they could turn his bladder bigger. We were all worried about his future as we don't know what's going on when he grows up until we first visited the great Dr. Robson recommended by my family doctor in July, 2009.

We only visited Dr. Robson for three times and just followed his instruction to do some daily work but you can't imagine how amazing it is for him to easily get this big problem solved without using any medicine. Each word he told my son to be aware of, my son could remember those words even now. He encouraged my son and gave him hope. Eventually my son "graduated" from his clinic and never wet his bed for a long time.

Once again, I thank you greatly for your help with my son's problem, Dr. Robson. Also, I really appreciated your kindness, your confidence and your knowledge on how to cure every single one of your patients.

Sincerely,

Aspen parents
