

Dear DR. Robson,

Oct 24, 68

I would like to thank you for all the help you've given us in training our son. I am very happy with my son's results. He has also grown to be more confident in himself.

The best thing was learning what worked and what didn't. I didn't know that training the kidney had anything to do with it. It's good to know that the less he held his urine the weaker the bladder became. Now we know what the goals are and I thank you for that. Thanks once again. An eternally grateful parent.
