

Dear Dr. Robson,

I just wanted to write this quick note to thank you for the help you gave me. I've been able to attend Scout camps, band camp, and have sleep-overs with friends, without having to worry about being embarrassed. I am very grateful for your help.

I was beginning to worry that this would be a life-long problem. It ~~seemed~~ we hadn't made any progress on our own. I appreciated you putting the treatment into hands. You handled it so well. There have been no relapses since seeing you. Not a quick-fix, but definitely worth the time and effort.
