

March 25, 2009

Dear Dr. Robson,

Just a quick note to let you know how thrilled I am about the results my son got after visiting you in Calgary. When I heard about my nephew's positive experience and outcome from seeing you, I knew the investment of time and travel would well be worth it! I was impressed during our office visits how you really cared about my son. You spoke to him directly and listened carefully about his daily life routines as well as his emotional concerns about bedwetting. You made the condition easy to understand for both my son and I and created a program simple to follow. Because of this, we saw results immediately after the first office visit then "graduated" after only three visits!!! He is much happier now and confident about himself at school as well as at home. He is proud of his achievement and is now not hesitant to do sleepovers and go away to summer camp. I thank you so much for treating my son as well as to Brenda for helping making the visits pleasant and comfortable. I will highly recommend you to my pediatrician here in BC as well as friends and family. It was a pleasure meeting you. We hope to see you and follow up in September.

Best Regards,

Parent Vancouver, BC
